New WARM UP

Protects the smartphone's battery and maintains it at the right operating temperature up to -40°C thanks to its built-in heating pad. Everything is there ! 3 different handlebar mounts are supplied with the SO EASY RIDER cover, which is universal, accepting all smartphone sizes. Phone Case

Main use :

During the winter, smartphones are often exposed to very low outdoor temperatures. In some extreme cases, the smartphone can no longer operate and displays a message asking the user to warm up his device to continue to use it. The cold create a disruption of the properties of lithium and processors contained in the battery of the smartphone. The battery wears out quickly and can cause irreparable damage to the phone. WARM UP allows the battery to maintain the perfect operating temperature and preserve the

phone's life.

- The user can choose 3 levels of outdoor temperature. Use at 0°C, -20°C and -40°C.
- The device will adapt his internal temperature in consequence and evacuate the exceed of hot air thanks to an air vent in the back of the case.
- SO EASY RIDER WARM UP is permanently connected to the supplied USB charger.
- The installation is done in just a few minutes.

100% of the handlebars are compatible with SO EASY RIDER.

The new mount, the ARKON USA T-Slot System is part of our 2019 range.

A robust system very easy to use everyday.

Good to know :

The entire SO EASY RIDER range is compatible with RAM MOUNT products.

BUILT-IN HEATING SYSTEM

100% COMPATIBLE

ALL HANDLEBARS & SMARTPHONES

REMOTE EASY TO HANDLE WITH GLOVES

The user can choose 3 levels of outdoor temperature. Use at 0°C, -20°C and -40°C. The device will adapt his internal temperature in consequence.

AIR VENT

A 5V fan ventilates the inside of the cover to prevent the accumulation of condensation.

New IS COOL

Protects the smartphone's battery and maintains it at the right operating temperature up to 40°C thanks to its built-in ventilation system. Everything is there ! 3 different handlebar mounts are supplied with the SO EASY RIDER cover, which is universal, accepting all smartphone sizes.

During the summer, smartphones are exposed to the sun's UV rays. These rays create an accumulation of heat and gas in the smartphone's battery. In some extreme cases, the smartphone can no longer work and displays a message asking the user to cool his device to continue to use it. The battery wears out quickly and can cause irreparable damage to the phone. IS COOL allows the battery to maintain the perfect operating temperature and preserve the life of the phone.

Constant airflow is generated by 2 powerful fans. A fan brings in the air inside and the second flushes stagnant hot air. A real vortex is created and the smartphone can not overheat.

SO EASY RIDER IS COOL is permanently connected to the supplied USB charger. The installation is done in just a few minutes.

3 mounts included in the box 100% of the handlebars are compatible with SO EASY RIDER.

The new mount, the ARKON USA T-Slot System is part of our 2019 range. A robust system very easy to use everyday.

Good to know :
